Dear Dr. Lane,

GRO-A - d.o.b. GRO-A.42
GRO-A

I enclose some correspondence about this patient with Christmas disease who is to have exploration of his right knee joint in June of this year. He had a bilateral knee replacement in February 1984 when we gave him approximately 75,000 units of Factor IX. We might be less liberal this time in view of AIDS but this is to give you early warning of a large request from us.

Yours sincerely.

GRO-C

Dear Hugh,

Mr. GRO-A - GRO-A.42
GRO-A

As you know GRO-A had bilateral knee replacements just over a year ago. The left knee is fine but the right knee is causing some pain. I am not concerned that there is an infection in this joint but I suspect that the femoral component and/or the patellar component are loose. I have no alternative other than to re-explore the joint and we will get him in to do this in the not too distant future. I think that he will have to remain off work from his clerical job at GRO-A until we get him sorted out.

Yours sincerely,

Hugh Phillips, B.Sc Hons., M.B., F.R.C.S.,
Consultant Orthopaedic Surgeon

Dear Alec,

Mr. GRO-A - GRO-A.42
GRO-A

I hope to get GRO-A in in June or July to have another look at his right knee joint. How much notice do you need in order to supply him with Factor IX at the time of surgery?

Yours sincerely,

GRO-C

Hugh Phillips, B.Sc Hons., M.B., F.R.C.S.,
