Dear Jean

re: Annual Returns For 1984

Enclosed are our returns. Please note:

- 1) We have used your forms, apart from the "Treated in 1984" sheet, which is on our printout. Patients listed on this printout are those who were treated in 1984. People whose names do not appear were not treated. The letter 'Y' means yes. The list includes all treatments which we are aware of that were given at other places, and these other places are indicated in the notes.
- 2) The "Amounts of material used" sheets A1-7 relate to the Royal Free only, and home treatments given to patients under the care of the Royal Free. It does NOT include materials used at other Centres.
- 3) We will send separate sheets for Associate Centres, which are known to have treated our patients. This whole matter is currently under review in North East Thames since the present arrangements don't work too well. I may write to you separately about this.
- 4) ✱ Our "Treated in 1984" printout does not include details of "inhibitor present 1984" or "hepatitis 1984". These details ✱ have been filled in on your printout. In the former category, T+ means tested and inhibitor found to be present; NT means not tested; T- means tested and no inhibitor detected. An asterisk in the hepatitis column means that the patient had acute hepatitis and you should have had all hepatitis forms relating to these attacks.
- 5) We have not yet had time to complete forms relating to patients

/continued.....
