PRCP/AO

Dear Mr. Thatcher,

Death Certification

Thank you for your letter of 25th February. As a member of your Advisory Committee, I have of course been in touch with the discussions to which you refer and at a personal level I would be broadly in agreement with the position set out in detail in your letter. As you know, we have had a Committee jointly with the Royal College of Pathologists on death certification but there is nothing in the proposals made in your letter which would be seriously at variance with what the Working Party is likely to recommend.

I will discuss your letter with the College Officers and if necessary will send a supplementary comment.

Yours sincerely,

GRO-C
