GRO-A

v DEPARTMENT OF HEALTH

1. Your minute of 1 February to Anita James refers. I was greatly reassured by the way you had related the current claim to the sections of the previous HIV haemophilia litigation. As you say, many of the issues have already been documented for the earlier case.
2. You noted in paragraph 13 that you were uncertain how much time and effort you should invest in further work on this case. Much depends on SOL's answer and I will be pleased to speak further with you about this once Anita James has had a chance to consider the careful analysis you have provided for her.
