Neil

I am very sorry for the delay in providing this response. As I said before I thought that this had already been dealt with by Charles Lister earlier this year. As he is no longer available I have had to go through the earlier emails with his brief notes. It is clear that he had decided that a "general" response to the points raised by Ms Grayson would be the only way forward.

Ms Grayson is a very active **GRO-D** organiser of Haemophilia Action UK, the main aim of the group is to secure a public inquiry into contaminated blood products, the group is already taking legal action against companies in the US who supplied plasma products in the 1970s. The second aim is to get the Government to pay full compensation to all haemophiliacs infected with hepatitis C through blood products. The announcement made by John Reid on Sat 30 August that an ex-gratia payment scheme is to be set up, has not appeased her and we can look forward to a great deal more correspondence and PQs from her MP Jim Cousins.

The response I have given is very short and general, better to say less than more, this was apparently what Charles had agreed to do. It is not clear whether you needed a draft letter or just a response form us. I have provided the latter.

Jill

Do you have any news with this?

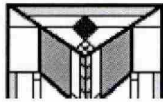

Many thanks

Kind regards

Neil

I am sorry that this has not been done. **GRO-A** and until now had assumed that a response had been sent back. Having looked at the papers there seems to have been some discussion between Charles Lister (now left DH on secondment) and the CJD Unit about the proposed reply. I have left a message for Charles to ask him about it, but the CJD Unit contact is not around. I will see what I can find out.

This is a difficult one, hence the reason for some of the delay in responding, but I will try to get back to you as soon as I can.

Jill

As discussed. I would be grateful if someone could provide a response. Apologies if this is not for you but Zubeda said that she did have the original query and had started something, I am sure that she said that she would be passing onto you - although I may be wrong.

Many Thanks

Kind Regards

Jill/Rowena

I understand that Charles has now moved on, but I would be grateful for a reply to send to the Retained Organs Commission about the attached enquiry. It has been outstanding for a very long time now.

Briony

Earlier today we spoke regarding Mrs Carol Grayson's unanswered enquiry. The details of her enquiry are contained within the earlier sequence of e-mails.

Steve would gratefully appreciate it if Mrs Grayson could receive a prompt response as it's been over 3 months since Charles Lister was forwarded her enquiry. Consequently I would appreciate it you could forward this e-mail on to Charles Lister's old unit.

Many thanks

Emma
