3. Other Infections

2.

1. There are no other known infections.

4. Consent

1. I am not sure if my mother was asked for consent or whether any risks were discussed with her prior to any transfusion.

5. Impact

- 1. When my mother became ill, she suffered from several bouts of depression, extreme tiredness and was unable to do anything through lack of energy. Her social life was very limited and as I was her only child, she depended on me to care for her everyday needs. I lived with my mother through all of the worst part of her life.
- 2. On a routine ward round at the GRO-B n or around the GRO-B I recall hearing a student doctor say something about hepatitis C to the Consultant. I asked my GP if he thought my mother might have had this infected blood and he confirmed she did have it but did not know when or where. I believe it would have been between GRO-B
- 3. It has always played on my mind as I feel her life was taken away from her.

6. Treatment/Care/Support

1. At the time of my mother's death the hepatitis C infection wasn't heard of.

7. Financial Assistance

1. No financial assistance was received.

8. Other Issues

1. I do not have any comment to make in this section.

I believe that the facts stated in this witness statement are true.

Signed. GRO-B
