DATE, TIME PROBLEM	
18/12/95	Mr. ramp concerned that she did not know the result of the laser cone. - I told her that her GP had a report, but she said that the GP had told her to ring the Colp. Clinic. She also said that she had been told that she had had her cervix removed. ^{m DSV} I advised her that this was not so. - She was also concerned that she had Hep. C (unfortunately this result had been sent back from the lab. after her letter from her clinic visit ^{had been sent to her} and she had not been informed) She was told to tell her GP who referred her to Dr Anderson. - I confirm that the Hep. C result was positive.
25/12/95	Dlw SHO - who had informed her of the operative procedure and the Hep C result.
