Dear Dr. Hill.

RE: (? Christian name)BUGGINS died approx May 1986.

I understand from Dr Peter Acland (Home office pathologist) that you looked after this child at the Children's Hospital. He died last year and Dr Acland kindly let me have the brain as I understand he was HIV Positive. I have got sections which are really quite interesting but difficult to interpret and I wondered if it is possible to have a look at the notes as I have only a scanty clinical history.

Many thanks for your help.

Yours sincerely,

GRO-C

Helen L Whitwell.
Consultant Neuropathologist.
