Ref. limitations on number of plasma donations in
a batch of concentrate

Further to our recent correspondence (mine 3/12/76, yours 8/12/76)
+ telephone conversation today I would like to put our pool size for
factor 1x to the maximum consistent with one batch in an
freeze drier (some 360 bottles) i.e. approx 500 l of plasma
which would be higher than your present intention for
factor VIII. Do you agree?
