Dear Terry

Re Heated factor VIII concentrate

Thank you for your letter of 7 February which has just arrived. In addition to the four names which I have already submitted to you, I should now like to apply for heated NHS concentrate for the following 12 patients, all of whom have been found to be HTLV3 antibody negative:

GRO-A	(541077)	GRO-A	(491600)
	(522809)		(523841)
	(518258)		(492848)
	(532747)		(498951)
	(506264)		(505040)
	(506265)	GRO-A	(527432)

The following patients have had blood taken for antibody testing, but we are still awaiting the results:

GRO-A	(569287)	GRO-A	(484466)
	(571097)		(554236)
	(539722)		(522787)
	(492847)		(527431) ← vwd. not relevant
	(510032)		(568595)
	(506261)		(501368)
	(475014)		(473013)

The following are HTLV3 positive:

GRO-A	(527943)	GRO-A	(481893)
	(484554)		(502355)
	(487673)	GRO-A	(525079)
	(468292)		

I will send you a further list of antibody negative patients as soon as the results are available and of course I should like to switch to heated NHS material for all patients, irrespective of their antibody status as soon as supplies permit.

Dr T J Snape

Incidentally, I am afraid none of the patients for whom I am requesting concentrate come into the category of having received no replacement therapy for the last six months.

Many thanks.

Yours sincerely

GRO-C
