29th March 1985

Dear Mr. Williams

Thank you for your letter of 15th March, asking for realistic proposals for plasma harvesting over the next five years.

For the year 1985/6 we put proposals to our Regional Health Authority for the facilities to use 45000 SAG-M packs as part of our programmed proposals towards meeting our targets by 1988..

In view of the fact that these proposals have been severely cut and we will only be able to use approximately half that number, I can give you no realistic proposals as to when we might ever achieve our targets.

I am sorry I cannot be more helpful.

Yours sincerely,

GRO-C
