Dear Dr. Bidwell,

FACTOR VIII AVAILABILITY

I am given to understand that the 'change-over' from cryoprecipitate to freeze-dried factor VIII is now well advanced and that soon cryoprecipitate will not be available. I would be grateful if you can confirm whether this is so.

If this is correct can you tell me when this event is likely to occur? My interest is (of course) financial for as you know we purchase our stocks of material and I would need to know details of the proposed costs. I believe factor VIII concentrate is currently very expensive, and would value your guidance on which commercial preparation is currently regarded as the best buy.

Yours sincerely,

GRO-C
