

APPENDIX C

Discussion Document on the Designation of Haemophilia
Centres

Reference Centre Directors have continued to review the criteria for the treatment of families with haemophilia. The enclosed Discussion Document has been drawn up to incorporate views expressed by Directors, and by Task Force 1 of the World Federation of Haemophilia.

The DHSS are now considering issuing an update of HC(76)4 which may include a listing of treatment facilities available to families. In view of this possibility, we hope that agreement on the proposals suggested in the Discussion Document can be reached in Cardiff.
