Dear Morris

SUPPLIES OF BLOOD PRODUCTS TO NORTHERN IRELAND

Following our recent discussions, you will be aware that arrangements for the funding of our contract fractionation for Northern Ireland have not been resolved. While this situation does not reflect any omission on your part, I have now been advised that funding from SNBTS development funds will not be made available to meet any increase in plasma processing for Northern Ireland.

Therefore it is with considerable regret that I must advise you that at the present time, I am unable to make any commitment to supply products to your Centre above the level established in 1985/86 for the following products.

Stable Plasma Protein Solution 400 ml	9,500 bottles
Stable Plasma Protein Solution 100 ml	100 bottles
Human Albumin (20%)	1,530 bottles
Human Albumin (1g)	150 bottles
Factor VIII (Heat Treated)	9,500 bottles (1.9 million US units)
Factor IX	1,050 bottles (300,000 US units)
PPSB	120 bottles
IgG (N) IM	900 bottles
