Dear Roger

ADVISORY COMMITTEE ON THE VIROLOGICAL SAFETY OF BLOOD

Thank you for your letter of 13 January suggesting the formation of an advisory committee to provide advice to the Health Departments on the virological safety of blood.

I think it important that the UK Blood Transfusion Services should act in unison on this subject, with the benefit of the best available advice. I therefore agree to the proposals and terms of reference outlined in your letter.

Yours sincerely

GRO-C

MICHAEL B FORSYTH
