Mr Burrage

**HEPATITIS C**

1. Thank you for your minute of 12 April, which I am not copying because of the sensitivity of the topic.
2. I will go into more detail about various points raised in your minute in a separate reply.
3. I agree that it will be helpful if SOLB4, CA-OPU and I agreed the "rules for discovering" relevant papers.
4. The paper of 22 December summarised information obtained during one days work. I doubt whether all the relevant work on hep C between 1989 and 1991 could be done within the two days you suggest.
5. For these reasons, I would suggest a meeting of the interested parties. It would be helpful if an instruction were received from TOTO as to how much of this work is still necessary.

Dr A Rejman
