AIDS LEAFLET : STD CLINICS

Dr Rodin telephoned this morning - he spoke to the Medical Society for the Study of Venereal Diseases (MSSVD) Council last week. STD consultants would be most grateful to have copies of the "AIDS and how it concerns blood donors" leaflet. He understood at the Council meeting that some consultants were aware of the suggestion and had already obtained copies from their Regional Blood Transfusion Centres.

x | This suggests that a low-key approach to leaflet distribution is already taking place - but that the Regional Transfusion Centres will soon be needing more leaflets (? preferably the amended version when the others have run out).

You are examining this point I believe GRO-C 26/2.

Is it correct - and what is the amended version? Should Miss Edward be taking the lead on this?
