Dear Alison,

Preventive Action against Transmission of AIDS
through Blood Donations

Thank you for your letter of 15th January.

Prior to the new leaflet our practice had been to make the old leaflet available at our sessions where it was displayed prominently. Now that the revised leaflet and Health Circular have arrived we have stiffened up the routine, and this is described in the copy of the memo the RDO has sent to all his staff. In addition to this, all Sessional MOs have been supplied with relevant literature and they should be able to answer at least some of the more basic questions.

Yours sincerely,

GRO-C
