Dr. V. Mitchell
Dept. of Haematology
The Royal Infirmary
Leicester, LE1 5WW
England

Dear Dr. Mitchell:

We have had a report concerning the development of hepatitis in one of your hemophilia patients who had received KonyneR-HT, Factor IX Complex Human. We would be most grateful if you would let us know the full particulars regarding this case, history of other blood or plasma products received within 6 months, type of hepatitis, laboratory studies, etc., in that, to date, there have been no confirmed, heat-treated product-related cases of hepatitis of any type in any patient who has received either the heat-treated Factor IX or heat-treated Factor VIII product.

Our sincere thanks for your help.

Sincerely yours,

GRO-C

G.M. Akin, M.D., F.R.S.H.
