1. Dr Mitchell in Leicester has requested information on the follow-up carried out on the batch of Konyn-4T which was reported to have caused HBsAg positivity in one of his patients. The child's parents are keen to have further information, so Dr Mitchell would be grateful for a rapid response.

2. I have been asked for more info. on the antibody titres to Gram -ve organisms (eg. E. coli) in Gammune. Do you have any data?

REPLY:

Marie can you D.A.K.
