

Our Ref MWT/svs

11th July 1986.

Dr. V. Mitchell,
Department of Haematology,
The Royal Infirmary,
Leicester,
LE1 3WW.

Dear Dr. Mitchell,

Our representative, Mrs. Anne Walton, has told me that you are still awaiting information on the batch of Konyne HT which was reported to be associated with hepatitis in one of your patients.

May I apologise on behalf of Cutter U.S.A. for the delay in responding to your earlier request for information. The details you kindly provided were forwarded to our Medical Services Department and they have conducted a full review of the batch history.

We can confirm that there have been no other reports of hepatitis related to administration of this batch and the records confirm that the batch passed all tests for HB_sAg.

Dr. Akin noted that the patient also received National Health Service product shortly before his first injection of Konyne HT.

Please contact me if you would like to discuss this further or if you would like to speak to Dr. Akin about it. I can ask him to telephone you from the U.S.A.

Yours sincerely,

Marie W. Tatt (Mrs.),
Regulatory Affairs Manager,
Cutter Medical.
