FOLLOW UP ON REACTION REPORTS

ONE

1. Koate HT Hepatitis Report : Prof. Temperley
(CSR 30259)

Prof. Temperley has written to Dr. Akin giving the information he requested. The evidence will be difficult to refute so we must assemble as much data as we can on this batch. Testing of samples should be pursued.

Remaining stocks are being returned to us today (22 vials).

2. Konyne HT : Leicester Incident

Apparently Dr. Mitchell was satisfied with the information provided as he has not raised the subject again. I will let you know if there are any further developments but we are not actively following up this case at the moment.

Regards,

Marie Tatt.
