4th December, 1984.

Dear Paolo,

One of our prospective clients, Dr. Hamilton - Newcastle, has shown interest in participating in the IVIG/ITP study. I would be grateful if you could consider him as an investigator and let me know your decision.

With regard to the Koate HT trial, the situation has changed dramatically ~~within~~ the last few days. A haemophiliac has died from AIDS and the death of this patient has developed into a big public and press campaign in favour of Heat Treated material. Because of this we are now selling Koate H.T.

It is apparent that all centres will be completely converted to Heat Treated material without the need for a study. I would be grateful if you could let me know your feelings on this matter.

Hoping to hear from you soon,

Yours,

GRO-C

Walid Marzouk.
