Dr. E. E. Mayne,
Consultant Haematologist,
Department of Haematology,
Royal Victoria Hospital.

Dear Elizabeth,

We have completed the retrospective study on our stored sera from your patients. The results of the anti-HTLV III seroconversions from negative to positive are as follows:-

	LAST NEGATIVE RESULT	FIRST POSITIVE RESULT
GRO-A	13.1.84	20.7.84
	12.10.84	19.4.85
	4.2.83	6.10.83
	15.8.83	13.1.84
	20.5.83	9.3.84
	21.1.83	5.1.84
	11.11.83	12.6.84
	16.9.83	2.2.84
	11.2.83	19.11.83
	14.9.83	20.3.84
	28.9.84	10.7.85
	9.8.83	9.3.84
	No serum	11.3.83
	No serum	11.2.83
	No serum	10.2.84
	No serum	16.2.83

* Serum of 11.11.83 the anti-HTLV III has risen to just below cut-off.
Last totally negative specimen is dated 20.5.83.

Yours sincerely,

GRO-C

 J. H. Connolly.
