22nd April 1980

Dear

I understand that there is presently a shortage of cryo-precipitate, resulting from a temporary problem at Eistree.

If you do need additional material during this period, may I remind you that we have Koate, manufactured by Cutter Laboratories U.S.A., available at 9 pence per unit, regardless of quantity.

Koate is available in three nominal pack sizes, 250, 500 and 1,000 units. Administration kits can be provided free of charge with the small home treatment pack.

I hope you find this of interest.

Yours sincerely,

David R. Williams
Director
