

Dear Doctor,

GRO-A

Re :

The above named patient is involved in a national prospective hepatitis study. It is thus very important that he receives only f.VIII containing material of one type : in his case :-

CRYOPRECIPITATE

(ALLOCATED MATERIAL TO BE TYPED IN CAPITALS)

In an emergency situation, where this material is not available to you, the above request can be ignored but in any event I would be grateful if you will complete the details below and return this card to me.

Yours sincerely,

P. J. Kirk (Research Registrar to
Dr. Rosemary Biggs)
