

LORD MAYOR TRELOAR COLLEGE,
FROYLE,
ALTON, HANTS.

December 1975

Dear

In view of the problems of hepatitis in haemophilia, I have been asked by Dr Rosemary Biggs, of the Oxford Haemophilia Centre, to conduct a survey on this subject.

Your son has been selected to receive only *KRYOBURIN* when he requires transfusing. By limiting him to this type of factor VIII containing material it will be easier to trace the source should he contract hepatitis.

If you have any queries concerning this survey I would be happy to discuss the matter with you.

Yours sincerely,

GRO-C

P.J. Kirk
Research Registrar.
