Dr. P.J. Kirk,
Treloar Haemophilia Centre,
Lord Mayor Treloar Hospital,
Alton.

24th October 1975

Dear Dr. Kirk,

Re: Nicholas SAINSBURY :-

During the summer holidays Nicholas had two forms of treatment. First of all Cryoprecipitate, six bags on the 12th August for a bleed in the right ankle, another six bags on the 15th August, another six on the 18th August and another eight on the 2nd September and another six on the 3rd September. However he also had some concentrate given to him by his brother GRO-A while he was on holiday and the Sainsbury family have a book in which they keep all their home therapy records.

Yours sincerely,

GRO-C

C.G.L. Raper
Consultant Haematologist
