Dr. M. Chisholm,
Consultant Haematologist,
Royal South Hants Hospital,
Southampton,
Hampshire.

Dear Dr. Chisholm,

re: Gary BENNETT GRO-A 67

GRO-A

For your information, I enclose copies of:-

- 1) His bleeding episodes and transfusions so far this term
- 2) Orthopaedic chart
- 3) Laboratory results

He has had a course of prophylaxis for targeting into his right elbow.

He attends physiotherapy three times weekly for quadriceps exercises and works well.

AIDS RELATED INVESTIGATIONS:

Clinically he exhibits none of the stigmata of AIDS. Examination of his superficial lymph nodes on 28.2.83 revealed palpable bilateral shotty inguinal lymph nodes. There was no change when re-examined on 9.6.83 apart from a palpable tiny left cervical lymph node.

For your information we have undertaken the enclosed AIDS related tests. We are repeating these before the end of term and will let you have a copy of the results when they are available.

Yours sincerely,

GRO-C

M. Wasset
S.C.M.O.
