Miss Dodd

GRO-C

Dear Miss Dodd

Following our telephone conversation in January I am writing to confirm that the HIV antibody test on your son taken at the end of November was negative. The other tests performed on this sample were to check for his Hepatitis B antibodies and this shows that he has made a good response to Hepatitis B vaccine and does not for the time being need a booster. The sample also showed that he was Hepatitis C antibody positive.

I enclose an appointment for the Paediatric/Haematology clinic as we feel it is very important to review Oliver from time to time in this clinic to check how his treatment is going and also to up date you about any recent advances in the treatment of haemophilia and to answer any questions that you may have.

If this appointment is inconvenient could you please phone Dr Bevan's secretary on Ext GRO-C and we will arrange a mutually convenient time.

Yours sincerely

GRO-C

DR MEGAN ROWLEY
Senior Registrar in Haematology
