Dear Morgan

BLOOD PRODUCTS - WORKING GROUP <sup>ON</sup> LIKELY TRENDS IN DEMAND

Following the meeting of 20 October which you and Dr Bevan attended, copies of the note have already been circulated but I enclose one for convenience, it has been decided to set up a small working group with the following terms of reference.

"To consider the likely trends in the demand for blood products over the next five to ten years, taking into account the practicabilities of supply".

Dr Biddard has already been in touch with Dr Bevan about the composition of the group. I have written to R A Owen explaining that Professor Bloom would be consulted, and indeed invited to meet the group at some stage in their deliberations. It looks as if the group will comprise:-

Dr Maycock	
Dr Darnborough	
Dr J D Cash	
Dr Helen Dodsworth	- Haematologist
Dr Ian Gillies	- Consultant Anesthetist

The idea is that rather than call all the experts to a series of meeting the Working Group should meet them individually and encourage them to put forward their personal assessment of trends and requirements. The intention seems to be to start with the likely demand for Albumin.

Yours sincerely

GRO-C

T E Dutton
