Re: AIDS Leaflet

Because the revised AIDS leaflet is not yet available from the DHSS, we have had our present leaflet overprinted. In the section "Who is at risk from AIDS?" - No.1 has been altered to "Practising homosexuals". These leaflets should now be available at all sessions - the original leaflet is being withdrawn.

A further leaflet "Some Reasons Why You Should Not Give Blood" is also being distributed - for donors to read before seeing the receptionist. We hope this will: (i) save some donors an unnecessary wait and (ii) focus attention on the AIDS leaflet.
