Subject: Harold Gunson - Message from Marcela Contreras

Just a short note to remind you that Harold Gunson is very hurt and disillusioned with the DoH and NBA after the "grilling" during the HCV litigation court case. I have spoken to him twice and he felt he was defending the DoH and Dr Jeremy Metters, previous Chairman of MSBT for decisions that he was not party to. As I said last week, it would be nice if you or the Chairman could drop him a note, acknowledging the help and expertise he has given to the Service. This is particularly so, when he was giving his time and expertise as a retired man, who has dedicated a lifetime to the English NBS.

Best wishes

Marcela
