Dear Dr

re: name
 address

vCJD at risk 'for public health purposes'

Further to our recent correspondence about this patient, I am writing to confirm that I have written to (copy of letter enclosed).

I am also enclosing with this letter:

- a copy of the "information for patients" which we sent to your patient.
- a document giving clinical information about vCJD and blood transfusion.
- a document from the HPA summarising the actions now required by you.
- a GP report form for you to complete and return to your local CCDC (stamped addressed envelope provided).

Your patient has been advised to see you at his/her convenience but has also been encouraged to contact me if there are further questions.

With kind regards,

Yours sincerely
