Dr Newsome
Consultant Haematologist
Blackburn Royal Infirmary
Bolton Road
Blackburn BB2 3LR

Dear Dr Newsome

Re: HCV Lookback Programme

We have now almost completed the data collection for the above study at our end.

We were informed by the Clinical Director from the Northern Zone that the documentation (letters and proformas) for patient follow-up process will be produced centrally by the Department of Health. These are to be used in the next phase of the process, that is the trawl of the hospital records to identify at risk recipients.

We were also informed that the necessary proformas will be available by the early part of April 1995.

I would like to arrange a meeting with Consultant Haematologist one evening in Lancaster Blood Centre to discuss the way forward for this follow-up study. Please indicate your available dates on the list provided and return to me at your earliest convenience. I will then arrange a date suitable for the majority of Consultants on the list, if not all, to attend this meeting.

I will choose a date which can be attended by at least one Haematologist from each hospital.

Thank you for your help.

Yours sincerely

Dr K H Shwe
