Review

Problems with ears. Discharge from right ear. Both ears are "clogged up". Seen by G.P. - appointment with ENT surgeon today.

Rt. knee troublesome recently - Bleed at end of September required 1/5 2 of Not treating himself on all occasions but more often than not. General health good.

Initial problems at school with being teased about leucorrhoea - resolved by teachers after Nicholas' friends "beat up" the culprit.

Very rebellious + impatient with mother who says they are not getting on very well. He says

GRO-C

HT - 159 cm Wt. 38.8 kg.

Height almost on 70th centile while weight below 50th centile (near to 25th).  
Ears not examined.

Mouth healthy. No nodes. Aene. + on forehead.

Mod. engorged. Both antecubital fossae.

Chest clear.

Abdomen - no masses; no tenderness; liver + spleen not felt.

Joints: Very small effusion into Rt. knee. Not painful. Full range of movement. Good quads.

all other joints - full range.

Routine blood samples (Nicholas performed venipuncture)

Review 6/12

(If knee remains a problem Rt. Knee with contact + make appointment for Orthopaedic Clinic)

GRO-C

9/1/90

Brought up by mother

P.C. Hamstring blood (L) side.

HPC. Playing badminton all last week.

On Fri developed pain in hamstring, but thought just stiffness.

Worse on Sat & by E. Fri Sat night & again on Sun - 3 bottles.

Still painful to walk on using crutches.
