RS
CVS N.A.D.
Abdom.
Fbc + ESR + mantoux. Fe + TTBC
LFT's
Urea for mc + s.

GRO-C

24/11/90 Review
Mr. H. - things are "fractured" Not getting on with Nicholas.
Confirmed by Mrs. H.
Also "unstable" to family.
"Depressed". Didn't go to school for a week after Xmas.
Mr. Hirsch says he has opted out of the arguments. Doesn't speak
to Nicholas. Lets on. GRO-C
Nicholas because he is being less disruptive. He was very
well & said he wasn't doing anything disruptive at home &
school but hated school.
Parents' relationship - "friends" but working on it.
See notes kept for details.

DATE	(Each entry must be signed)
	<p>No particular target joints. Bleeds once in 7-14 days. Most bleeds settle after one dose of 750-1000u. Mottles still giving more than 1/2 treatments - said to be because he sometimes has bleeds in fingers. Seen by GNT dept last month for routine checks, no problems. General health fair - tiredness periods. Smokes - 4 per day. Bleed in right hand & back this morning. O/E. Ht. 170-5cm. Wt. 47-8kg. Mouth healthy. No lymphadenopathy. Mild acne. Chest clear. Abdomen - liver & spleen not palpable. Joints - full range of movement of all joints except first I.P. joint of rt. middle finger which was swollen & had slight limitation of movement. Small tenders swelling 7cm. x 3cm. to left of sacrum - bleed. Treated with 990u oral stat. To have repeat dose of 990u tomorrow & then treat only if he still has pain & tenderness. Review Monday if not resolved.</p>
	<p>Routine blood samples including Fe + TIBC + joints Review 6/12 GRO-C</p>
24/1/91	<p>Received O EG as above GRO-C</p>
17/4/91	<p>Mr. Hirsch came to discuss hepatitis C - GRO-C was to have come with her but unable to come today for various reasons. Understood - "Nicholas is a changed boy" Getting on well with parents Since being in car has recovered all his former energy & sense of humor. Much of the change in attitude attributed to the education received during his year at William Ellis - not academic education but introduction to the "real world". Has arranged to transfer to a private 6th form college next year. Motivated to work hard. Playing in Middlesex County Junior Badminton Championship - partnering GRO-C in the doubles. Mrs. Hirsch feels this family is "a normal family again, with some of the chaos caused by normal teenage boys" GRO-C</p>

CLINICAL NOTES (Each entry must be signed)

15/5/91

Mr. & Mrs. Hirsch requested appointment to discuss Hep. C. - very distressed by report in Sunday Times re carcinoma of liver associated with Hep. C.

Interview videotaped

Discussed CT scan as part of monitoring program and interferon as possible treatment.

No evidence to suggest immediate cause for concern but he will be followed very closely.

Nicholas has left school for the present. Placement provided College in Sept. Working in parents' warehouse.

(Treated for 2 1/2 before William Ellis entered prison).

GRO-C

24/7/91

Review (Videotaped Mr. & Mrs. H. Nicholas)

GRO-C

Mr. Hirsch felt they were "one big happy family" now. Others agreed. Nicholas has lost his interest and because he is less "lazy" is shouted at less often. Because there is less shouting

GRO-C

GRO-C

In spite of all this goodwill & some joking about, Mrs. H. looked quite sad and worried for part of the time. Reference to hepatitis was clearly not wanted by the parents & this was not pressed. Nicholas said he vaguely remembered drinking it last year.

Nicholas likes coming here because "every time he comes we find something new wrong with him."

Discussed HIV + sexual transmission briefly.

Bleeds approx. once a week, minellaceous sides, no target joints. Reported to one dose of Zid.

Bled into left wrist this morning, following a knock, & bled before coming here. Not into the joint.

No problems with venous access. Joints literally aches. He has a blood into his head. Hard.
