NURSING REPORT

7/1/84	<p>Admitted to the hospital for a laparoscopic cholecystectomy. The patient is a 45-year-old female with a history of gallstones. She is currently on a clear liquid diet and is being monitored for any signs of infection or bleeding. The surgical procedure was performed successfully, and the patient is recovering well. No complications have been noted.</p>	
7/12/84	<p>Prepared for the patient's discharge. The patient is stable and is able to walk with assistance. She is being discharged on a diet of soft, bland foods. The patient is to return to the hospital for a follow-up appointment in two weeks.</p>	
8/13/84	<p>Discharge summary: The patient was discharged on 7/12/84. She is doing well and is able to perform activities of daily living. The patient is to return to the hospital for a follow-up appointment in two weeks.</p>
