Dear GRO-B

I hope you are beginning to feel better now that you have started on Thyroxine. You are due to have your thyroid function monitored by means of a blood test and in view of the distance involved in your attendance at our clinic it would make sense for your GP to do this and adjust your dose of Thyroxine as necessary. I have spoken to Dr Mills and he is happy with this arrangement.

Your next appointment to see us is 7th October '97 and I look forward to seeing you then. Of course you are welcome to telephone at any time if there is any kind of problem with these arrangements.

Yours sincerely

Liz Spence  
Gastroenterology Specialist Nurse
