Dr Frank Hill
Chairman
UKHCDO
Birmingham's Children Hospital
Steelhouse Lane
Birmingham B4 6NH

Dear Frank

I wonder whether UKHCDO has a view on viral screening for PUPS who receive exclusively Recombinant products. We are currently carrying out baseline viral serology on these individuals but no long term follow up. Clearly if they receive plasma products then we revise this. I understand there is no consensus throughout the UK but I would be interested to know the UKHCDO views.

Kind regards.

Yours sincerely

GRO-C
