Pre-factor 2.01

Post factor 6.91

Due for 2 bottles factor 8 bottles tonight
for rivarox.

14/1/92 - Haematology.

Bill has developed gross swelling
of his scrotum/penis over last
1-2 days. Also has oedema of R leg,
L thigh + abdominal wall & probably
some ascites. JVP possibly elevated
also. Liver/spleen not obviously
palpable. (2) free stable - no new bleed.
↑APTT/↑PT/↓Plat along with gross oedema
is keeping with liver dysfunction 2° to
chronic liver disease.

D/w Dr. Hay -

①. Maintain FVIII:C at 100% by
i.d. dosage

∴ 5 bottles Monoclate this am
+ pre e post levels.

②. Spiraprostactone 100mg o.d.

③. Vitamin K 10mg 1/2 slowly on this
may help prolonged coag. tests.
