Dear Dr. Feld,

GRO-C Liverpool GRO-C

Admitted: 11.01.93 Discharged: 13.01.93
Diagnosis: Hepatitis, haemophilia, portal hypertension and
oesophageal varices
Operation: OGD & SCLEROTHERAPY - 12.01.93

I reviewed your patient in Professor Shields' clinic today. He is getting no problems at present related to his liver and I have checked his liver function and alpha-feta protein today. *Do record that*

We will bring him back into hospital in June for a gastrosocopy under general anaesthetic and sclerotherapy if necessary. *Do record that*

He also showed me an ulcer on the lateral aspect of his right ankle. This appears to have nearly healed with dry dressings and I don't think we have anything further to offer here. We will review him in June.

Yours sincerely,

MR. GRO-D
SURGICAL REGISTRAR.
