Dr. M. S. Feld

GRO-C

Liverpool

GRO-C

Dear Dr Feld

William Murphy, **GRO-C** 1934,
GRO-C

Diagnosis: Haemophilia and chronic hepatitis C.
Chronic venous insufficiency.

I am delighted that his leg ulcer is now healed following a few weeks treatment with 4 layer compression bandage.

He continues to have some venous eczema around the right lateral malleolus and we shall therefore continue with the above treatment on a weekly basis (carried out in the OPD Clinic at RLUH) and he will be reviewed in 1 month.

Yours sincerely

Dr C M King FRCP
Consultant Dermatologist
