Dear Elizabeth

Re: Mrs GRO-B: D GRO-B  
DOB: GRO-B 72

As you know, this young lady is pregnant and she booked today at my Antenatal Clinic. I know that she attends you regularly because of both Von Willebrand's Disease and hepatitis.

Perhaps you would let me know what significance you feel her problems have in relation to her pregnancy.

Yours sincerely

D D BOYLE  
Consultant Obstetrician
