CLINICAL NOTES (Each entry must be signed)

12/5/92

Nicholas' mother father seen by EG,  
PT & Dr Dusterko

Nicholas has good understanding of hep C  
and his condition.

Advised that his liver disease is probably  
mild at present, but difficult to be sure without  
liver biopsy. Possibility of scanning, ultrasound,  
in the future.

Treatment options discussed: Advised α-IFN.  
Chance of response ~ 50%. Chance of long  
term remission with 1yr of ~ 30%.

Nicholas & family keen on IFN. Would  
like to start in June mid-June after the  
exams.

Check liver RNA

Mother phoned: he has painful ear.

Had grommets removed in 1989-June.

GP says O/E grommets look inflamed.

Refer → Mr Stearns.
