

7/1/98

Courtney HILYARD was  
originally diagnosed as  
Haem A 28% and  
treated in Newcastle  
1971 - 1983 with  
Cryo & BPL FVIII

Oxford then received in  
1986 notification from  
ST. THOMAS :

→ "mild Haemophilia A"  
but no treatment or  
level given -  
then Oxford was told  
later to amend their  
record to "normal" -  
(No sure by whom)

Rosemary Spooner
