GRO-C

NAME NICHOLAS HIRSCH

DATE 8.1.92

URINALYSIS

NAD.

28/1/92

Noted to have mild neutropenia (gran 1.7) Hb 13.1 Hb & HCV neg.  
adequate immunity to HBV. Bilirubin raised - 26. Chest X-ray normal.  
Hb has dropped almost 1g

28/1/92

(Grants) Seen to discuss Dr Goldman's last letter.  
Normal ranges, vitamins, metabolism then discussed  
= general terms.  
Measured largely - OK to repeat tests in Feb  
+ others. Bp stable + for illness.  
They have no specific worries w.r.t Nicholas  
- He seems quite comparable to his peers  
in most respects.

a business trip to India they will bring Nicholas to discuss  
Hep C briefly.

6/3/92

Attended centre.

Had bleed in forearm 29/2/92.

Treated and subsided

Left in residual twinge when left arm etc.

of NAO

full movements no swelling.

Mr. Hirsch going away so slightly  
anxious.

Suggest rest for a few days.

Carbide prophylaxis prior to heavy  
work.

GRO-C

7/4/92

Mrs. Hirsch requested appointment - very upset by letter re  
Hep C trial.

Seen with Dr. Paul Telfer.

It appears that letter was sent in error offering to enrol Nicholas  
in Interferon trial. He is not old enough to enter trial.

Mr. + Mrs. Hirsch came to next meeting about trials + should  
only have been sent follow-up information from the meeting. Both  
PT + El apologized to Mrs. H. for error. He was reassured to know  
nothing new was known about Nicholas to prompt offering enrolment.  
Still very worried about Nicholas who is definitely not in good  
health. LFT's grossly abnormal. Needs to see Dr. du Sables  
asap.

GRO-C

16.4.92

Dismissed with Dr. du Sables. Appt. offered for 21/4 but Nicholas  
has made GCSE exams 21/4 - 27/4 Provisional appt. for 11 am  
on Tuesday 12/5. Mrs. Hirsch to confirm.
