Director  
Newcastle Haemophilia Centre  
Royal Victoria Infirmary  
Newcastle upon Tyne  
NE1 4LP

Dear Peter

Courtney HILDYARD - GRO-C 42  
GRO-C London GRO-C

I enclose for you a letter that I have written about a patient who says he was previously under your care. I find it rather unusual that his factor VIII is 99 u/dl, in that he says he was labelled as having mild haemophilia A. Of course, it may be that this has increased secondary to his chronic hepatitis C but, I also find the description of the treatment that he had during the late 1970s and 80s rather unusual for somebody with mild haemophilia A.

His major concern is that he has extreme tiredness resulting from his hepatitis C infection, which has resulted in him being unable to work. I wonder about the accuracy of the history that he has given me. I would be grateful if you could look in your records and give me any details that you may have.

With kind regards,

Yours sincerely

GRO-C

Christine A Lee
