During the clerkship of Mr Murphy the family have been quite upset and at times angry towards myself. They were unwilling to give me a Hx explaining they had given one to the A+E SUO. They demanded a consult. Haematologist attend to determine the Factor VIII problem. I did Dr Wright SA Haem this issue. He did not think a haematology presence was required but gave advice of on FFP + Factor VIII. Ward 3 & will provide the Factor VIII.
