Dear Deborah

Thank you for your letter dated 19 December in which you ask about my thesis. As part of a postgraduate degree I did produced a thesis called 'Hepatitis and Haemophilia' which was lodged with the University of Sheffield in 1994. This is a hardback bound thesis extending to almost 200 pages. There are only two copies in existence, my personal copy and the one lodged with Sheffield University which is kept in the main University library. In theory theses are available to be borrowed by anybody, but because there is some yet unpublished information contained in the thesis I think there is a 5 year ban from lending it to outside bodies.

Most of the information, however, has already been published and if anybody wants any specific information as to the place of publication they can contact me direct.

Kind regards

GRO-C

M MAKRIS
Senior Lecturer/Honorary Consultant in Haematology

PS: Can I have ten copies of all the treatment factsheets so that I can keep them in the Haemophilia Centre for distribution to anybody who wants them. Thank you.
